DETAILED ACTION

1. The Amendment filed by Applicant on 06/18/2009 has been entered.

Response to Amendment/Arguments

2. Applicant's amendment and arguments filed on 06/18/2009 have been fully considered and they are found persuasive.

3. The rejection of claim 9 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn.

Claim Objections

4. Claim 9 is objected to because of the following informalities: Formula VII is mentioned in claim 10.. Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-28, 43 and 45-53 are rejected under 35 U.S.C. 102(b) as being anticipated by Lewis et al., U.S. Patent No. 6,852,816 (hereinafter "Lewis" and PCT Pub. No. WO02/28929 published 11 APR 2002). Lewis teaches a composition comprising a solvent block copolymer, including A-B-A block copolymers, comprising a core and terminal block wherein the core block comprises zwitterionic pendant groups having a structure in accordance with Y-B-X as claimed. See Lewis, Abstract; col. 2, line 60 through col. 4, line 51; col. 7, lines 12-28; col. 10, line 54 through col. 11, line 45. Lewis further teaches substituents and compounds of general formula VIII. See col. 5, line 24 through col. 6, line 8.

7. Although Lewis does not put forth data covering polydispersity or degree of polymerization, the Examiner contends based on the process for polymerizing ABA type block copolymer and comonomer composition the properties are inherent in the teaching of Lewis. Because the PTO has no means to conduct analytical experiments, the burden of proof is shifted

to the Applicants to prove that the properties are not inherent. See In re Fitzgerald, 619 F.2d 67, 205 USPQ 594 (CCPA 1980); In re Best, 195 USPQ 430 (CCPA 1977); In re Napier, 55 F.3d 610, 613, 34 USPQ2d 1782, 1784 (Fed. Cir. 1995).
